

2009 Unidata Users Workshop Using Operational and Experimental Observations in Geoscience Education

June 8 - 12, 2009

Boulder, Colorado

For More Details:

www.unidata.ucar.edu

Keep watching for further details!

Focus Areas

Remote Sensing
Instrumentation
Field Experiments

Data Assimilation
Climate Observations
Research and Operational Networks

Goals

Expand the use of instrumentation and observations in geoscience education
Share hands-on activities, curricular materials, and ideas for improving teaching and learning [in the geosciences].

Related events taking place before or after the Users Workshop

- NCAR ASP Colloquium, "Exploring the Atmosphere Using Observational Instruments and Techniques" on May 31-June 12, 2009:
